Hello!

your name
and
background?

Agenda

- Presentations ✓
- Mediaeval textuality and editions
- TEI critical apparatus
- *Break*
- Exercise preparation
- Hands-on
- Check and feedback

Mediaeval textuality and editions

Text carriers

- Variety of different materials (e.g., metal, papyrus, parchment, paper...)
- Materials influence the type of text and its preservation over time

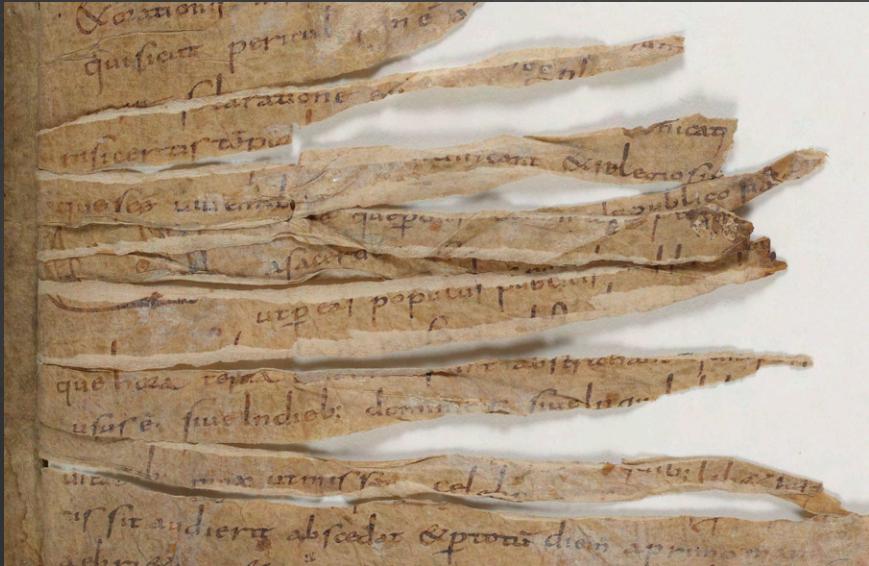

Golden Horns of Gallehus
(<http://samlinger.natmus.dk/?q=guldhorn+by+sa>)

M<HIMPFXFFTIV:HOITIISFY:HORTE:TFPIWQ:
ekhle wagastiz:holtijaz:horna:tawido:

“I Hlewagastiz Holtijaz made the horn”

Some are less
resistant...

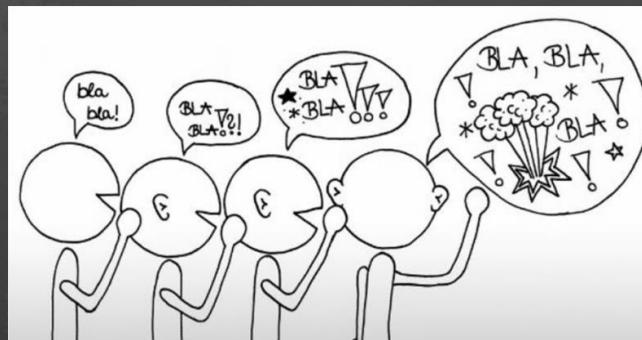

Bibliothèque nationale de France, Département des Manuscrits,
Latin 2316, fol. 133r.

Codex Bobbiensis G.VII.15 (VL 1) f. 1r.
Ministero della Cultura. Biblioteca Nazionale Universitaria di Torino.

Transmission

- Most of the times, we have to deal with manuscript transmission
- Copying by hand generates mistakes!
- Authoriality was considered differently than it is today
- Copists could change the wording, the contents and the structure of the text intentionally

Documentary vs. reconstructive

- Transcriptions can [should] be diplomatic, to “recode” and remedialise as much information as possible from the source
- But: many textual representations are possible (diplomatic, semi-diplomatic, normalised, critical...)
- Documentary vs. reconstructive approach

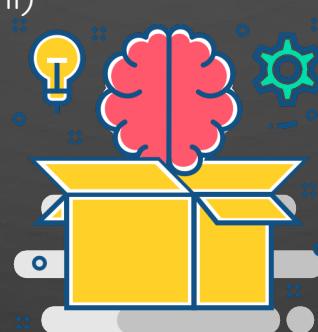

Transcriptions of each witness (possibly in multiple representation levels)

Establishment of a critical text

Different approaches

- There are different approaches for dealing with mediaeval textuality
 - Genealogical approach (Lachmann)
 - “Bon manuscript”(Bédier)
 - Historical-critical edition
 - Italian school: Neo-Lachmannian method
 - Copy-text (Greg)
 - New Philology (Cerquiglini)

Collate and analyse

- In the end, our job is to compare copies of texts/works to come closer to the alleged original
- We can do this manually....

- Or computationally

- Automated collation

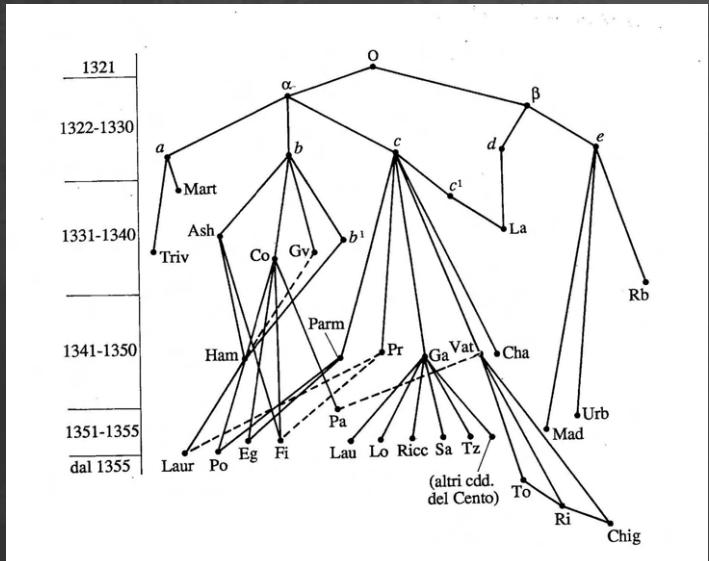

- Phylogenetic analysis

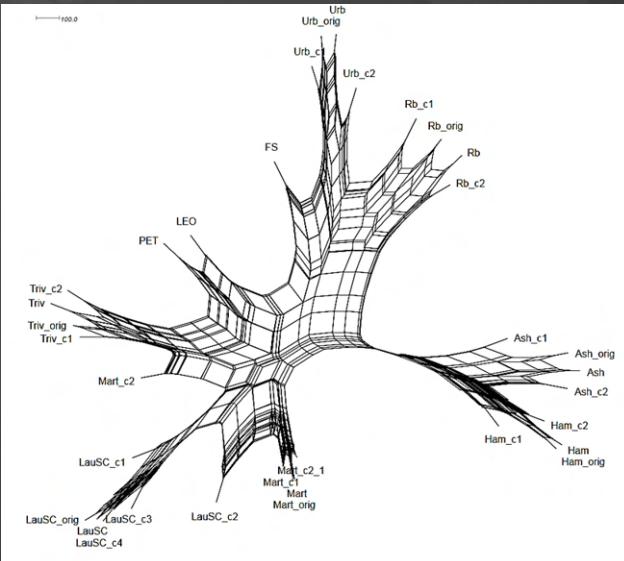

We want trees...

- The relations between the witnesses of a text or a work are very important to understand the role of each witness
 - Trees can be “trees”...or “bushes”

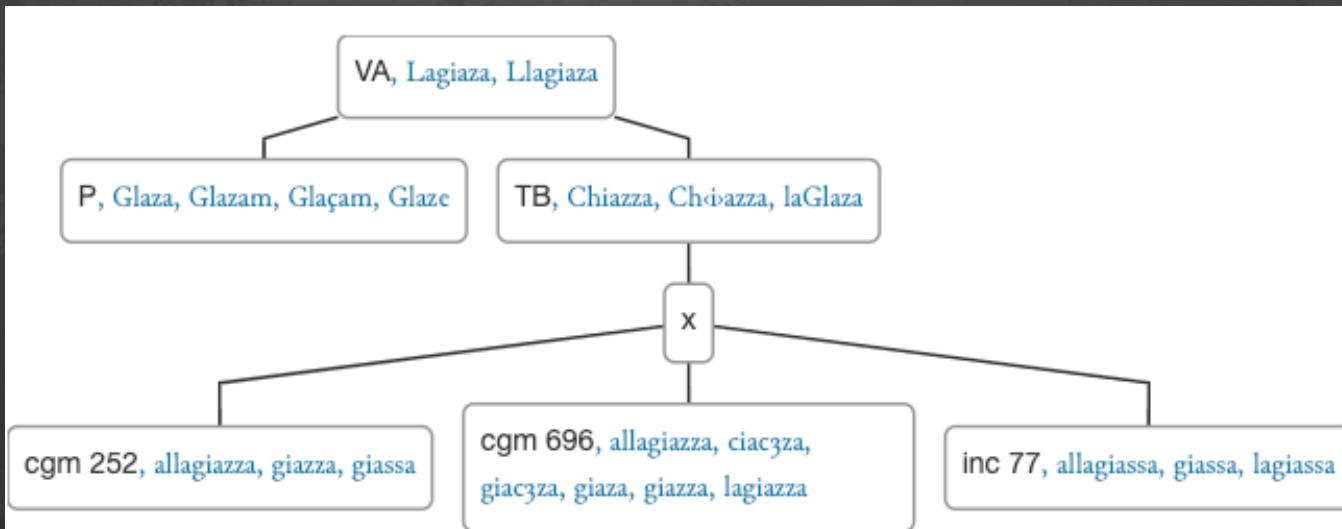

Stemma of the Divine Comedy by Petrocchi (1966/67)

J.-Prof. Elisa Cugliana

...but people expect a text

- What to do with the whole variance?

Back in the paper world...

- In the paper medium, people were often *forced* to carefully select the data, squeeze it to make it fit onto the page...
- Only in some cases people produced synoptical editions (when the number of relevant witnesses/versions was limited)

The critical apparatus

- Usually scholars put the variants which had not made it to the established text in the apparatus, at the bottom of the page

Taeger 1996, critical edition of Heliand

What happens in the digital world?

- Often the apparatus has been completely neglected, in favour of a New Philology approach
 - Criticism by scholars who still believe in the role of the philologist as a guide through the intricacies of mediaeval textuality
 - Edition as a "summary", a "selection" of the textual transmission
- The traditional critical apparatus can be augmented in digital editions, realising its hypertextual nature to the fullest

Bieler's Commentary (1951, 1966)

I. CONFESSIO

LIBRI EPISTOLARUM SANCTI PATRICII EPISCOPI.

LIBER PRIMUS: CONFESSIO.

Ego Patricius peccator rusticissimus et minimus omnium fidelium et contemptibilissimus apud plurimos patrem habui Calpornium diaconum filium quendam Potiti presbyteri, qui fuit uico ~~bannaue~~^m taburniae[†]; ullulam enim prope habuit, ubi ego capturam dedi. Annorum eram tunc fere sedecim. Deum enim uerum ignorabam et Hiberione in captiuitate adductus sum cum tot milia hominum — secundum merita nostra, quia *a Deo recessimus et praecepta eius non custodiuiimus* et sacerdotibus nostris non oboedientes fuimus, qui <nos> nostram salutem admonebant: et Dominus *induxit super nos iram animationis suae et dispersit nos in gentibus* multis etiam usque ad ultimum terrae, ubi nunc paruitas mea esse uidetur inter alienigenas,

TEI critical apparatus

The basics

- <app> → opens the apparatus **entry**
- <lem> → contains the lemma selected or established for the critical text
- <rdg> → contains a reading
- @wit → points to the witness presenting a certain variant

What we need

- We have to define our method (in the <variantEncoding>, contained by the <encodingDesc> in the <teiHeader>, after the <fileDesc>)

```
<encodingDesc>
  <variantEncoding method="parallel-segmentation" location="internal"/>
</encodingDesc>
```

- We need a list of our witnesses (for example in the <back> of the edition)

```
<listWit>
  <witness xml:id="El">Ellesmere, Huntingdon Library 26.C.9</witness>
  <witness xml:id="Hg">Hengwrt, National Library of Wales, Aberystwyth,
  392D</witness>
</listWit>
```

Peniarth

(These witnesses are of course described in the <msDesc> in the <teiHeader>)

3 methods

- Location-referenced
- Double end-point attachment
- Parallel segmentation

In the [body](#) of the document, the base text (here El) will appear:

```
<text>
  <body>
    <div n="WBP" type="prologue">
      <head>The Prologue of the Wyves Tale of Bath</head>
      <l n="1">Experience though noon Auctoritee</l>
      <l>Were in this world ...</l>
    </div>
  </body>
</text>
```

Elsewhere in the document, or in a separate file, the apparatus will appear. On each line in the base text.

```
<app loc="WBP 1">
  <rdg wit="#La">Experiment</rdg>
  <rdg wit="#Ra2">Eryment</rdg>
</app>
```

```
<variantEncoding method="double-end-point"
  location="external"/>
<!-- ... -->
<div n="WBP" type="prologue">
  <head>The Prologue ...</head>
  <l n="1" xml:id="WBP.1">Experience <anchor xml:id="WBP-A2"/> though noon Auctoritee</l>
  <l>Were in this world ...</l>
</div>
```

The apparatus will be separately encoded:

```
<app from="#WBP.1" to="#WBP-A2">
  <rdg wit="#La">Experiment</rdg>
  <rdg wit="#Ra2">Eryment</rdg>
</app>
```

Parallel segmentation

- While encoding our text, we open an <app> every time it's needed (i.e., when there are variant readings)

```
<variantEncoding method="parallel-segmentation"
  location="internal"/>
<!-- ... -->
<l n="1">
  <app>
    <lem wit="#El #Hg">Experience</lem>
    <rdg wit="#La">Experiment</rdg>
    <rdg wit="#Ra2">Eryment</rdg>
  </app> though noon Auctoritee
</l>
<l>Were in this world ...</l>
```

Some further details

- We can group our variants, for instance according to the @type (substantive vs. orthographic) or according to other features:

```
<app>
  <lem>Experience</lem>
  <rdgGrp type="orthographic">
    <rdg>Experiense</rdg>
    <rdg>Exp&rience</rdg>
  </rdgGrp>
  <rdgGrp type="substantive">
    <rdg>Experiment</rdg>
  </rdgGrp>
</app>
```

- We can also nest our <app>s:

```
<app type="substantive">
  <rdg wit="El Hg Ha4">
    <app type="orthographic">
      <lem wit="El Hg">Experience</lem>
      <rdg wit="Ha4">Experiens</rdg>
    </app>
  </rdg>
  <rdg wit="Cp Ld1 La">
    <app type="orthographic">
      <lem wit="Cp Ld1">Experiment</lem>
      <rdg wit="La">Ex&peiment</rdg>
    </app>
  </rdg>
</app>
```

Make it simple

- To avoid overlapping, it might be reasonable to separate the merely “textual” approach from the palaeographic one
- Elements such as <line>s and <choice>s, which we often use while transcribing diplomatically, might complicate the encoding
- For now, we'll focus on the critical approach, starting with normalised *editions* of witnesses
- Taking it from the textual level, we'll use <l>, instead of <line>, to encode the lines of the poem (leaving aside the diplomatic perspective)

Exercise Preparation

Instructions

- Open a new TEI document in Oxygen
- Fill in BASIC teiHeader information:
 - a <fileDesc> with <title>; <respStmt>; <publicationStmt>; <sourceDesc>
 - + 5 <msDesc>s containing the *sigla* of our sources (see PDF)

```
<msDesc>
  <msIdentifier>
    <settlement>Heidelberg</settlement>
    <repository>UB</repository>
    <idno>cpg 357</idno>
  </msIdentifier>
</msDesc>
```

- after the <fileDesc>, open an <encodingDesc> with the specification of the method used for the apparatus (parallel segmentation)
- In the <body>, you are going to encode the text as a <div type=poem>, with a <lg>
- Create a <back>, after <body>, for the <listWit>

The material

- Walther von der Vogelweide, “Nu alrest lebe ich mir werde”
Edited by Braun, Glauch and Kragl (Lyrik des deutschen Mittelalters, <https://www.ldm-digital.de/show.php?au=Wa&hs=A&lid=2528>)

I	A Wa 50 = L 14,38; CB 211a
Überlieferung: Heidelberg, UB, cpg 357, fol. 8r	
	Nu alrest lebe ich mir werde, sit min sundic öge siht daz here lant unde och die erde, dem man vil der eren giht. 5 mirst geschehen, des ich ie bat: ich bin kommen an die stat, da got menschlichen trat.
1 Paragraphenzeichen am Rand (Liedbeginn)	

1 ich] wohl als Rollenlied zu verstehen.
7 menschlichen Adv. als Mensch.

I	B Wa 12 = L 14,38; CB 211a
Überlieferung: Stuttgart, LB, FB XIII 1, pag. 143	
	Alrest lebe ich mir vil werde, sit min sündig öge siht das raine lant unde öch die erde, der man so vil eren giht. 5 es ist geschehen, des ich ie bat: ich bin kommen an die stat, da got menschlichen trat.
1 ich] wohl als Rollenlied zu verstehen. 7 menschlichen Adv. als Mensch.	

I	C Wa 22 (21) = L 14,38; CB 211a
Überlieferung: Heidelberg, UB, cpg 848, fol. 126rb	
	Alrerst lebe ich mir werde, sit min sündic öge siht daz reine lant unde öch die erde, der man so vil eren giht. 5 es ist geschehen, des ich ie bat: ich bin kommen an die stat, da got menschlichen trat.
1 ich] wohl als Rollenlied zu verstehen. 7 menschlichen Adv. als Mensch.

	Meister Walter von der Vogelweide Nu alrest leb ich mir werde, sint myn sundich ouge ersicht daz liebe lant und ouch die erde, dem man al der eren giht. 5 nu ist geschen als ich ie bat: ich byn kommen an die stat, da got menschlichen trat.
1 gesamte Strophe mit musikalischer Notation im Textblock	

1 ich] wohl als Rollenlied zu verstehen. 7 menschlichen Adv. als Mensch.

Base text!

Walther von der Vogelweide, >Nu alrest lebe ich mir werde< (A 50-56)

Überlieferung (Synopt. Schema)

- A Wa 50-56
- B Wa 12-17
- C Wa 22-32
- E Wa 201-211
- M Namenl/92v 1-6
- Z₁ Wa 4-15

Kommentar

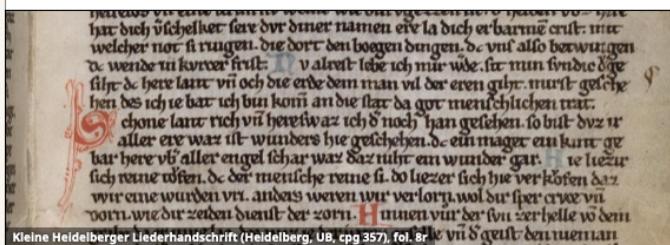

ÜBERLIEFERUNG: Das sog. Palästinalied gehört zu den meistüberlieferten Liedern Walthers und liegt in sechs Handschriften mit differierendem Strophenbestand vor, wobei der Liedensatz in allen Fassungen übereinstimmt. Das Fragment Z₁ enthält dabei nicht nur den vollständigsten Textbestand, sondern auch die einzige vollständig überlieferte Melodie eines Waltherliedes.

FORM: 4-a 4b .4-a 4b / 4c 4c

Stollenstrophe mit dreizeiligem, monoritem Abgesang. Vereinzelt tauchen weitere Auftakte auf (etwa Z₁ V,4), doch ist das Lied insgesamt sehr regelmäßig. Tongleichheit besteht zu dem Lied >Frawe mein durch ewer gute< (→ f Namenl/101r 10).

A Wa 50 = L 14,38; CB 211a

Example and advice

- Proceed word by word
- If a word is omitted, leave `<lem>` or `<rdg>` empty
- You can provide the type of variant
- If a word does not present variants, write it as normal text (not inside an `<app>`)

```
<text>
  <body>
    <div type="poem">
      <lg type="stanza">
        <l>
          <app>
            ><lem wit="#cpg357 #hbXIII1 #cpg848 #smscVII51"></lem>
              <rdg wit="#ms731" type="substantive">her walth[ ]er</rdg>
            </app>

            <app>
              <lem wit="#cpg357 #smscVII51">Nu</lem>
            ><rdg wit="#cpg848 #hbXIII1 #ms731" type="substantive"></rdg>
            </app>

            <app>
              <lem wit="#cpg357 #hbXIII1 #smscVII51">alrest</lem>
              <rdg wit="#cpg848 #ms731" type="orthographic">alrerst</rdg>
            </app>

            <app>
              <lem wit="#cpg357">lebe</lem>
              <rdg type="orthographic" wit="#smscVII51">leb</rdg>
              <rdg type="substantive" wit="#ms731">sihe</rdg>
            </app>
          > ich
          <app>
```
